

World's 1st Recyclable Handrail

New Technology:
Unrivaled.

- Smooth tracking ensures longer operational life of all handrail & drive components
- Easy to clean - no harsh solvents required
- Superior vandalism resistance
- Recyclable

Thermoplastic polyurethane handrails provide diverse solutions for all of your custom requirements.

World's Most Popular Escalator Handrail

NT combines unique aesthetics, durability and ease of installation while being kind to the environment.

Energy Efficient

NT is straighter than other handrails and requires less energy to travel through escalator drive systems - making it the most energy efficient escalator handrail available. Smooth tracking ensures optimum alignment and operation of all handrail drive components.

Manufactured in an ISO14001 facility, NT has been engineered to meet environmental standards, and are free of ozone depleting substances such as chlorosulphonated rubber compounds and PVCs.

NT is available in any custom colour or with antimicrobial protection.
